

## High-performance centrifugal separator An innovative solution for dust separation

Gas centrifugal separators have a simple design, are robust, cost-effective and have low-maintenance operation.

Characteristics and benefits:

- Reduced overall height
- Draught stabilises potential vortex and reduces pressure loss
- High separation efficiency and
- High separation accuracy through effective fine separation zones
- 30% of the investment costs of a filter system

Especially in closed circuits, the gas centrifugal separator is unbeatable for a multitude of technical processes in connection with the investment costs as well as service and maintenance costs.

- Processing Technology
- Environmental Technology
- Packaging Technology
